The initial consultation by an Interior Redesign Expert can give you just the boost you need to make the decision of HOW to begin taking control of your new home. A Professional like Mary Christensen, can help you make decisions and offer you new and up-to-date decorating possibilities. One of the first steps is to list the details and the scope of your project, this will help

develop a plan personally for you – keeping your desires and your budget in mind. Step-by-step there are many considerations when moving into a new home; like using the right color palette - that may make the overall difference just by the shades and tones of color you choose while striving to create harmony throughout your home.

Other things to consider are window treatments, lighting design, interior furnishings, space planning, and storage analysis. Using the knowledge of a professional is a smart tool; getting organized and knowing where to begin will make the process easier for you. Hometown Realty's Interior Redesign expert has been trained in each of these areas.
